

Peel To Reveal Your Healthiest Skin

Contact: Trish Stack 208/863-2396 trish@epionce.com

For maximum results and dramatic effects, a peel is an ideal way to strip away damaged cells and accumulated toxins and give your skin a healthy start. The latest addition to the **Epionce**[®] skincare regimen is the professionally applied Equalizer Peel. The **Epionce Equalizer Peel** is well-tolerated by all skin-types, including the most sensitive skin. The Equalizer Peel stimulates increased cell turnover, skin rejuvenation, and accelerates the healing process to reveal more beautiful, radiant skin. The layering of the peel and booster enables the skin care professional to design the optimal regimen for each individual for maximum results. Sensitive or dry skin types tolerate a single layer of the Equalizer Peel while the normal to oily/problem types can experience a better than Jessner peel response with multiple layers of Equalizer Peel and Enriched Apple Extract Booster.

The four steps in the **Equalizer Peel** process include:

1. Prep Solution (degreasing solution)
2. Equalizing Peel
3. Enriched Apple Extract Booster
4. Neutralizer

What makes the Equalizer Peel superior to other peels is the combination of natural-derived, modified beta hydroxy acids, which have faster yet more gentle penetration than plain salicylic acid or AHA peels. The Equalizer Peel temporarily improves the appearance of problem skin, reduces appearance of visible keratoses and improves the evenness of skin tone and irregular pigmentation, while smoothing the skin's texture. The Enriched Apple Extract Booster uses more water soluble agents that increase cell turnover. The net result is improved cleansing of pores and removal of scale, smoothing the surface, while brightening, tightening and hydrating the skin.

Episciences, Inc. integrates over two decades of research into the development of a highly effective cosmeceutical, non-prescription, dermatological product line. Epionce is a comprehensive and innovative skin wellness line designed to optimize the appearance and health of the skin by working at the core of the skin's own protective and reparative systems. It also prevents and reverses the effects of damaging chronic inflammatory factors.

Epionce is more than just a wrinkle cream – it is a product line that uniquely optimizes barrier function, while reversing and preventing activation and release of anti-inflammatory factors in the skin. It can be used to reverse and prevent visibly aging skin, sun damaged skin, and temporarily eliminate visible premalignant and benign growths, hyperpigmentation, acne, rosacea, dermatitis and problem skin.

About Episciences, Inc:

Episciences, Inc, was founded in 2002 and is based in Boise, Idaho. Episciences, Inc, integrates twenty-plus years of research into the development of a highly effective cosmeceutical, non-prescription, dermatological product line. This breakthrough product has been proven effective by 13 independent clinical studies to reverse and prevent the effects of visible skin aging and certain common skin diseases.
